EDUCATION

University of California, Berkeley | *Aug 2017 - May 2021*

- Electrical Engineering and Computer Science, B.S.
- 3.71 overall GPA, 3.83 technical GPA

TECHNICAL SKILLS

Strong: Java, Python, React, React-native, AWS Lambda, DynamoDB, HTML, CSS

Knowledgeable: SQL, ES6, MongoDB, Node.js, jQuery

EXPERIENCE

Starbutter AI Software Engineering Intern | starbutter.com | *May 2018 - Present*

- Developed and integrated a chatbot with a partner's API to send information and render results for the user, generating over \$1,700 in profit in the first month
- Worked directly with the CTO to design and implement a method of context-specific conversational repair for all of the startup's existing chatbots
- Created a React chatbot window, allowing interaction with the chatbots on any partner's site
- Utilized AWS Lambda, Cloudwatch, and DynamoDB to develop and launch 4 new chatbots

Codebase Software Developer | codebase.berkeley.edu | *Jan 2018 - Present*

- Built a React-native mobile app for Propel(x), saving the startup over 275 hours of development
- Implemented the entire frontend from scratch, including a dashboard and swipe interaction
- Structured the backend to make calls to the startup's API and pass data between components

EthiCAL Apparel Web Developer | ethicalapparel.org | *Aug 2017 - May 2018*

- Re-designed the business' front page and order form built on WordPress, helping to bring in over 5,400 new users
- Added mobile-responsive functionality to various other pages, affecting over 42% of total users
- Integrated Square API into internal website built with React to show live view of inventory

FitBliss Web Development Intern | fitbliss.com | *Jun 2017 - Aug 2017*

- Designed and developed the main tab for the startup's web application using jQuery, knockout.js, and lightbox.js
- Utilized the FitBit API to allow clients to sync SmartTrack activities, impacting 40% of all users

PROJECTS

Formations | github.com/trev4ev/Formations | *May 2017 - Oct 2017*

- A web application that allows choreographers to easily create and share dance formations
- Uses jQuery and Fabric.js for simple 'drag-and-drop' editing and Firebase to allow for collaborative editing

Panda Bot | github.com/trev4ev/PandaBot | *Jan 2016 - July 2017*

- A Facebook Messenger Bot that uses the 'facebook-chat-api' with Node.js to organize and store action items in group chats

OTHER SKILLS AND INTERESTS

- Dancing, Ultimate Frisbee, Graphic Design, Camping, Cinematography
